PROFILE

Developer based in Sweden. I've been building software since my teens, starting with small scripts and simple websites and gradually expanding into full-stack web platforms, native Android applications, desktop tools, and automation systems.

My work spans a wide range of domains: custom CMS-driven websites, Android apps, CLI utilities, data scrapers, self-hosted infrastructure, and more. I enjoy systems thinking — figuring out how all the moving parts connect and building things that actually work reliably.

EXPERIENCE

System Engineer

2022–Present

Gävle Energi AB · Gävle, Sweden

- Develops and refines automation and databases to harness the full potential of internal systems.
- Responsible for system development across metering programs and data collection routines.

Business Owner

2019–Present

Hemtopia · Sweden

- Running a property management company, combining electrical and metering expertise to manage properties cost-effectively.
- Developed internal tooling and web platform to support operations.

Full Stack Engineer

2021–2024

DigitalHyresvärd · Sweden (Remote)

- Built a SaaS platform for property management companies to handle rental invoices and tenant communications.
- Developed the full service from scratch in PHP with integrations against Kivra and Fortnox APIs.
- Handled backend (PHP, MySQL) through to frontend (Bootstrap, JavaScript) and open-source SDK libraries.

Metering Technician

2018–2022

Gävle Energi AB · Gävle, Sweden

- Managed meter data collection systems for electricity, water, and district heating.
- Oversaw operational status of collection infrastructure and led a team of metering technicians.
- Performed on-site service and maintenance of physical metering equipment.
